

MyOn Reader is a personalized web-based reading library for students in PreK through eighth grade. Students can access the site to read digital books from the **MyOn library**, which contains over 1,600 titles. These titles have both fiction and nonfiction titles. Periodically, the student will be given a short reading test to gauge the level they are reading and comprehending. This test page occurs approximately every 5 books. The test is given so that the program can accurately recommend books on the students' reading level. In the fall, the students will be able to access a report on how much they read and how much they progressed during the summer.

To access the **MyOn library** go to <http://www.myon.com/login/> . The first blank in the login must have **Chicora Elementary, Charleston County School District** in the blank exactly. If you begin to type the school name the auto fill should begin. As soon as you see Chicora's name, click on it. Then use the following username and password that was sent home with your student.
